

External Enclosure

Installation Guide

The Installation of External Box

Please read this installation carefully before you use the products.

Precaution:

1. USB bus can supply the fixed volt for 5V/500mA to supply for USB system. Payment attention to buy HDD: There is no need to supply the power of USB HDD if you choose the Volt of HDD within 500mA. Whenever use the USB bus to supply the power to HDD, try to plug USB HDD into the Mother board of PC directly. You must use extra power source (USB) to supply the power to USB HDD if you do choose the Volt of HDD over 500mA.
2. External box might not be able to start up or function properly for some H.D.D. due to insufficient electric current output from USB port, This is a very rare situation, if the situation do occur, please purchase an output DC 5V, 1200 mA switching adapter from your local electronic store.
3. If it is a new HDD, needs to processing the disk partition

System Requirement:

- Compatible with IBM PC, USB interface included , Windows 98SE/ME/2000/XP operate system.
- MAC computer system MAC OS V8.6 or higher.

Packing include
- USB2.0 + 1394a

Enclosure

CD Driver

Carry Bag

AC adapter

User manual & accessory kit

Transfer cable
USB 2.0 *1
1394a *1

Packing include
- USB2.0

Enclosure

CD Driver

Carry Bag

USB power cable

User manual & accessory kit

Transfer cable
USB 2.0 *1

FEATURE

1. Standard USB2.0 high speed transfer rate.
2. Support IEEE 1394a and can be chained. (USB + 1394a model)
3. All aluminum and super slim design, to enhance heat dissipation.
4. Screw free design, convenient for installation.
5. Small size, handy to carry.
6. Bright color led light cover by acrylic guard.
7. Plug and play / hot swappable.
8. Support Win 98SE/ME/2000/XP/Mac OS 8.6 above.
9. Only one PC at the time can access the drive(USB + 1394a model)

Transfer speed: 480Mb/S(USB2.0), 400Mb/S(1394a)
Consume electrical Voltage: 5V , AC adapter (USB + 1394a model)

Installation Guide:

1. Just push the button indicated in the diagram, then pull out the tray.

2. After H.D.D connects with tray, fasten H.D.D by screws.

You can remove the cable of USB after putting the icon of USB HDD on the desktop into the trash can.

FAQ

After plug the Mobile Disk into system, some note cannot find the Mobile Disk.

Some HDD of TOSHIBA or IBM cannot be identifying. This phenomenon shows the battery of notebook lack of power supply. At the moment, please use the power core, which come along with the product and plug the biggest side of power core into the USB interface in the rear side of notebook. Another side of power core plug into the interface of the USB Mobile Rack. (Just beside of USB interface). If you need to use the external mouse, still can plug into the power core and use it constantly.

How to solve it if you can't use the Mobile Dish under some OS:

It doesn't support any USB device under the WIN95 and NT4 OS, so that can't use the Mobile Disk.

After formatting can PC use in the MAC?

If use the Mobile Disk in the PC, can just format directly. If the PC & MAC cannot be in common use, you can use the MACOPEN software (download from the Internet) in the PC, format to the MAC model.
